

Sprint 4 Report

Product Name: Bite

Team Name: Munchies

Sprint start date: Tuesday, March 8, 2022

Sprint completion date: Tuesday, March 8, 2022

Revision #: 1

Revision date: Wednesday, February 23, 2022

Actions to stop doing :

- Procrastinating towards the beginning of the sprint
- Mention any issues late into the tasks instead of asking for help early

Actions to keep doing:

- Frequent communication amongst team members
- The distribution of task within team members
- Helping other team members with issues or roadblocks
- Scrum meetings three times a week and sprint meetings at the end of the sprint
- Updating members when we can't accomplish something or go to a meeting

Work completed:

1. Navbar search bar - shows user's location used for search and lets user research with a new one (Don't display on the landing page)
2. Automatic location button next to search button - asks the user to share their location and uses that to search instead
3. Dashboard button - navbar has a button to take the user to the dashboard page
4. Favicon - replace default react logo with bite logo
5. Footer - red bar at the bottom with some links (about, Github, etc)
6. Upload final product - find hosting service & change endpoints
7. Better "no results found" page - show the user more information & button to change filters
8. More info on liked restaurant popup - get more restaurant details on modal (from backend details endpoint)
9. New dashboard page - shows lists of user's likes and dislikes

Backlog:

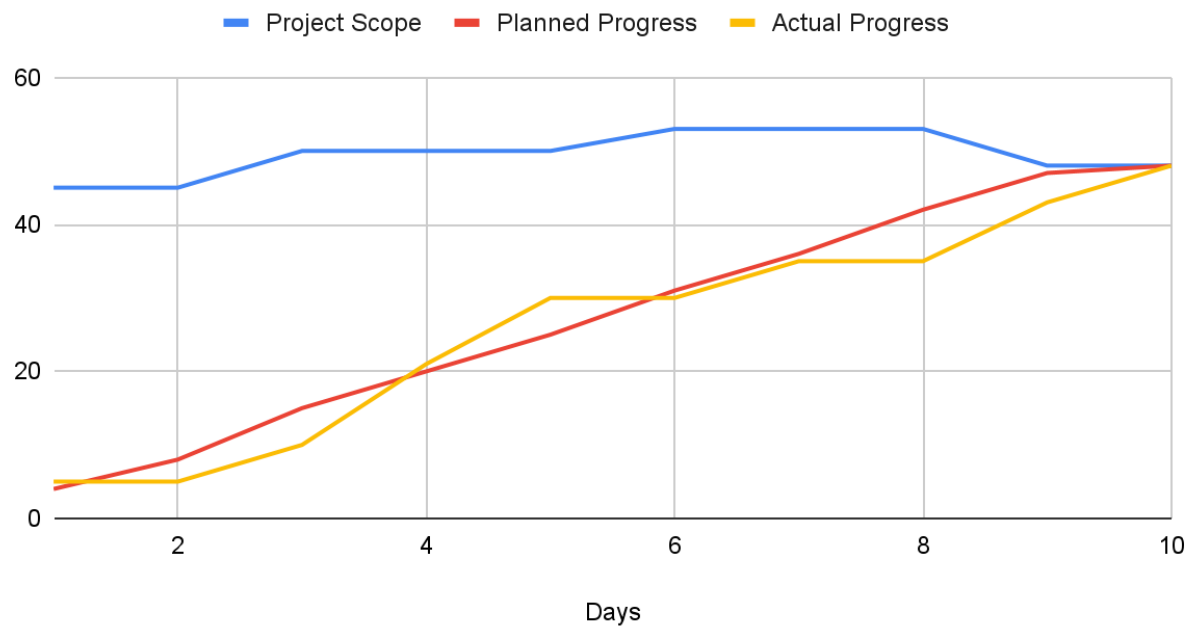

1. Add option to expand restaurant details on more results page
2. Implement user profiles - users can log in and see their likes across devices
3. Add affiliate links on yelp to monetize app
4. When a primary result is liked, give the user a prompt about how liking restaurants affects their future results

Work completion rate:

- Total Stories Completed: 3/3
- Completed Tasks: 11/12

- Total Hours: 48
- Total Days: 10 (5 days a week)
- Ave Tasks/Day: 1.1 tasks

Project Scope, Planned Progress and Actual Progress
