

Sprint Report #2

Munchies

Bite

Actions to stop doing :

- Procrastinating towards the end of the sprint
- Not being active enough in TA meeting

Actions to start doing:

- Update more often on the general chat
- Continue setting up the new team discord team channel
- Start adding more comments to the code so that other members can understand what was added or removed.
- When pushing to the repository send a description of what you pushed and the file's name so that everyone can understand the new changes.
- If needed we can start adding branches to the repo

Actions to keep doing:

- Keep learning about coding in CSS, javascript, and the yelp API.
- The distribution of task within team members
- Overall progress updates
- Continue having good documentation within our shared files
- Meeting with members and voicing any comments or concerns within discord
- Scrum Meetings three times a week with sprint meetings at the end of each sprint
- Sharing progress with the team
- Collaborating with other developers on the team
- When assigning tasks one split up the work evenly and distribute sections of each page to each developer evenly.

Work completed:

1. Replaced hard coded filters with user parameters
2. Added new primary result & filters pages to app routing
3. Modified api call to include user preferences
4. Made card component for primary result page
5. Filled primary result page with relevant restaurant info
6. Made card component for filters page
7. Linked all filter button toggles to user preferences in app state

Work not completed (& added to backlog):

1. Determine restaurant sorting
 - This needs to take into account user favorites, which will be added in sprint 3, therefore the sorting will also be deferred to sprint 3.

Work completion rate:

- Total stories: 3
- Total hours: 56
- Total days: 10 (5 days a week)
- Avg tasks/day: 1.4 tasks

Project Scope, Planned Progress and Actual Progress
