<p align="center">**Sprint Report #1**</p>
<p align="center">**Munchies**</p>
<p align="center"># Bite</p>

Actions to stop doing :
- Stop creating such large tasks and create more detailed tasks for everyone to have space to contribute.
- Stop having inconsistent user stories, and tasks between different documentation
- Stop changing files without sharing details before.

Actions to start doing:
- Begin communication everyone's task in detail
- Start adding more comments to the code so that other members can understand what was added or removed.
- When pushing to the repository send a description of what you pushed and the file's name so that everyone can understand the new changes.
- Start implementing more regular meetings, or updates through discord
- When assigning tasks one split up the work evenly and distribute sections of each page to each developer evenly.
- If needed we can start adding branches to the repo

Actions to keep doing:
- Learn more about coding in CSS, javascript, and the yelp API.
- Continue having good documentation within our shared files
- Meeting with members and voicing any comments or concerns within discord
- Sharing progress with the team
- Collaborating with other developers on the team

Work completed/not completed:
1. Release plan
2. Figma mockup
3. Set up GET requests
4. Make YELP Fusion account
5. Base React page
6. Landing / Search page
7. Results page
8. Link frontend to backend

Work completion rate:
- Total stories: 3
- Total hours: 15
- Total days: 10 (5 days a week)
- Avg tasks/day: 0.8 tasks
